Industrial Experience Focused on Production & Improvement

- The professional career began in 2000, and over more than two decades, the career path has covered production, quality control, paint technology, supervision, and process management.
- A significant part of this career has been in the automotive industry, particularly in the Saipa Citroën paint shop, where operational experience has developed alongside activities related to quality, standardization, problem solving, and process improvement.
- The professional focus is on turning everyday production challenges into practical solutions, reducing waste, increasing capacity, standardizing processes, and developing workforce skills.

Measurable Impact

- 50% Production Capacity Increase — a project to eliminate the primer layer from selected parts which, according to the resume, resulted in a reported 50% increase in production.
- 5 billion tomans Estimated Annual Savings — design and implementation of a project to eliminate 5 cm paper masking tape in rocker-panel PVC spraying.
- 132 hours Production Workforce Training — training of paint-shop production personnel for the Citroën 3C project and participation in the complete project commissioning.

Professional Experience

2016–Present — Saipa Citroën | Kashan Paint Shop — Sealer Production Supervisor

2022–2023 — Saipa Citroën — Factory Management System Assessment Specialist

2012–2016 — Saipa Citroën | Paint Shop — Painted Cabin Production Specialist & Supervisor

2010–2011 — Saipa Citroën — PT&ED Paint Shop Specialist

2023 — Silk Kashan Automotive Coating — Production & Quality Manager

2009–2010 — Saipa Citroën — Paint Shop Production Foreman

2007–2009 — Donyaye Granule | Kashan — Quality Control & Laboratory Specialist

2005–2007 — Manufacturing Company — Packaging Operator

2000–2003 — Carpet Company | Kashan — Machine Operator

Achievements & Recognition

- 707 hours of specialized training recorded throughout the professional career.
- More than 350 improvement suggestions submitted during collaboration with Saipa; more than 100 were implemented.
- Selected as a top representative of the suggestion system in 2022.
- The supervised team in implementing the S5 workplace organization system was selected as a distinguished team in 2017 and 2018.
- The paint-shop team was selected in the comprehensive assessment of the first quarter of 2021 as the top team.
- Experience in FMEA, Poka Yoke, QRQC, standardization, process assessment, and factory management systems.

Process Improvement & Engineering Projects

Elimination of Primer Layer from Selected Parts — reported result: 50% increase in production.

Design and Implementation of Double Conveyor — increased production capacity through simultaneous spraying of two parts.

Elimination of 5 cm Paper Masking Tape — estimated annual savings: 5 billion tomans.

Elimination of Wet Sludge and Implementation of Dry Surface Treatment for ED Parts — process improvement and waste reduction.

Replacement of Air-Dry PVC with Oven-Cured PVC — technology and process standardization.

Standardization of Paint Shop Instructions — quality, standardization, and process control.

BITON • Citroën 3C

- Completed specialized two-tone roof painting training (BITON) in France at Peugeot Citroën for one month in connection with the Citroën 3C project.
- Provided 132 hours of training to paint-shop production personnel for the Citroën 3C project and participated in the complete project commissioning.

Specialized Training & Development

Total specialized training: 707 hours	Paint Shop Painting Process: 40 hours
Basic Paint Defects: 48 hours	Emergency Response: 80 hours
Paint Technology: 24 hours	Supervision Principles: 16 hours
Citroën 3C Paint & Sealer Training: 150 hours	FMEA: 6 hours
Factory Management: 8 hours	QRQC / Problem-Solving Method: 30 hours
Factory Management System: 80 hours	The above are examples of recorded courses, and their total does not necessarily equal the full 707 hours of training.

Skills & Capabilities

Paint Production & Technology: Production Management, Automotive Paint Technology, Paint Shop, Sealer, PT&ED, Preparation, Primer, Clear Coat, UBS, BITON	Quality & Improvement: Quality Control, FMEA, Poka Yoke, QRQC, Problem Solving, Standardization, S5, Factory Management System, Process Assessment
Management & Training: Production Personnel Training, Supervision Principles, Skills Matrix ILU, Paint Technology Training, Workforce Development	Software & Administrative: Microsoft Word, Excel, PowerPoint, Internet, Office Automation, Internal Correspondence

Education

Bachelor's Degree — Engineering Technology in Information and Communication Technology (ICT) — Silk Kashan Institute of Higher Education — 2010-2012

Associate Degree — Computer Hardware Repair — University of Applied Science and Technology, Kashan Unit 17 — 2006-2009

Diploma — Electrical Engineering Technology — Mohammad Naraqi Technical High School, Kashan — 1998-2000
